

Remove Unwanted Static Electricity

Certified's **Static Relief** prevents the accumulation of static electricity in carpeting. **Static Relief**, when applied properly, will prevent unpleasant shocks from static electricity due primarily to low humidity in houses, businesses, hospitals, nursing homes or where computers are used. Certified's exclusive properties prevent soiling or yellowing and will not cause mildew.

DIRECTIONS: Shake well before using. Test fabric in inconspicuous place for color fastness before using.

TO PREPARE STOCK SOLUTION:

1. Normal application, dilute 1 quart (946 mL) to 3 quarts (2838 mL) water.
2. Spray to cover 200-250 square feet (18.6-23.23 sq. meters) of carpet using airless pressure equipment.

Do not aerosolize.

3. Do not over use.

NOTE:

A filter respirator is recommended during application.
