

An Safe Way To Remove Stubborn Spots & Stains

Pint - 6/cs.
Gallon - 4/cs.

C329-007
C329-005

R.T.U. pH - 10 - 10.5

Citrus Spotter is a new type of environmentally responsible product based on natural derivatives. It contains no chlorinated solvents...safer for the user, pets and plants. It's biodegradable, non-polluting and contains no unpleasant solvent odors. Citrus Spotter can be used effectively for pre-spotting before wet cleaning. Because of its fast evaporation, it can be used as a post spotter after wet cleaning. Citrus Spotter is a safe spotter for today's carpet and upholstery fibers and fabrics.

DIRECTIONS FOR USE

Shake well before using. Test fabric in inconspicuous place for color fastness before using.

1. Apply Citrus Spotter gently to spot. Use small quantities and blot up with white cloth or tissue. Discard soiled tissues.
2. If spot is a built-up deposit, then apply Citrus Spotter directly and allow to penetrate. Work in with a bone scraper to soften crust. Repeat as often as necessary. Scrape away and absorb softened materials as it forms.
3. Paints, lacquer, varnish, shellac, and other spots in this class that do not respond with Citrus Spotter may dissolve in Certified's P.O.G spotter.

**Fresh Paint
Old Varnish
Waxes
Asphalt**

**Some Cosmetics
Chewing Gum
Light Grease
Oil**
